1. Pause Indicator

if paused: Shows yellow text when video is paused

Reminds user to press SPACE to resume

2. Display Window

cv2.imshow("Ball Detection (No Kalman)", original_frame)

Creates/updates window with the frame

- Window title: "Ball Detection (No Kalman)"
- Content: original_frame with all drawings

3. Wait for Key Press

key = cv2.waitKey(30) & 0xFF

waitKey(30):

- Waits 30 milliseconds
- During this time, window displays frame
- Checks if any key was pressed
- 30ms $\approx$ 33 FPS (frames per second)

& 0xFF: Technical detail to get correct key code

Frame Display Loop:

Display Frame

Wait 30ms

Key pressed?
