

E-SUMMIT 2026

Problem statement title:

TRUSTNET AGENTIC AI SYSTEM FOR MISINFORMATION COMBAT Autonomous Multi-Agent Platform for Real-Time Detection, Prediction & Containment of Fake News

TRACK : Restoring Trust in the Age of Synthetic Media

TEAM NAME : ARYAVARTA

PROBLEM IN DETAIL

THE PROBLEM

GLOBAL SCALE:

73% of Indians exposed to fake news weekly
2.3 billion misinformation exposures annually (India)
Fake news spreads 6X faster than truth
Average viral fake reaches 100,000+ users in 24 hours

ECONOMIC IMPACT:

₹78 billion annual damage (India, 2024)
\$250 billion globally
7% loss of trust in online information

REAL-WORLD HARM:

Election manipulation
Vaccine hesitancy (health crisis)
Communal violence (150+ incidents in 2024)

Financial fraud & market manipulation

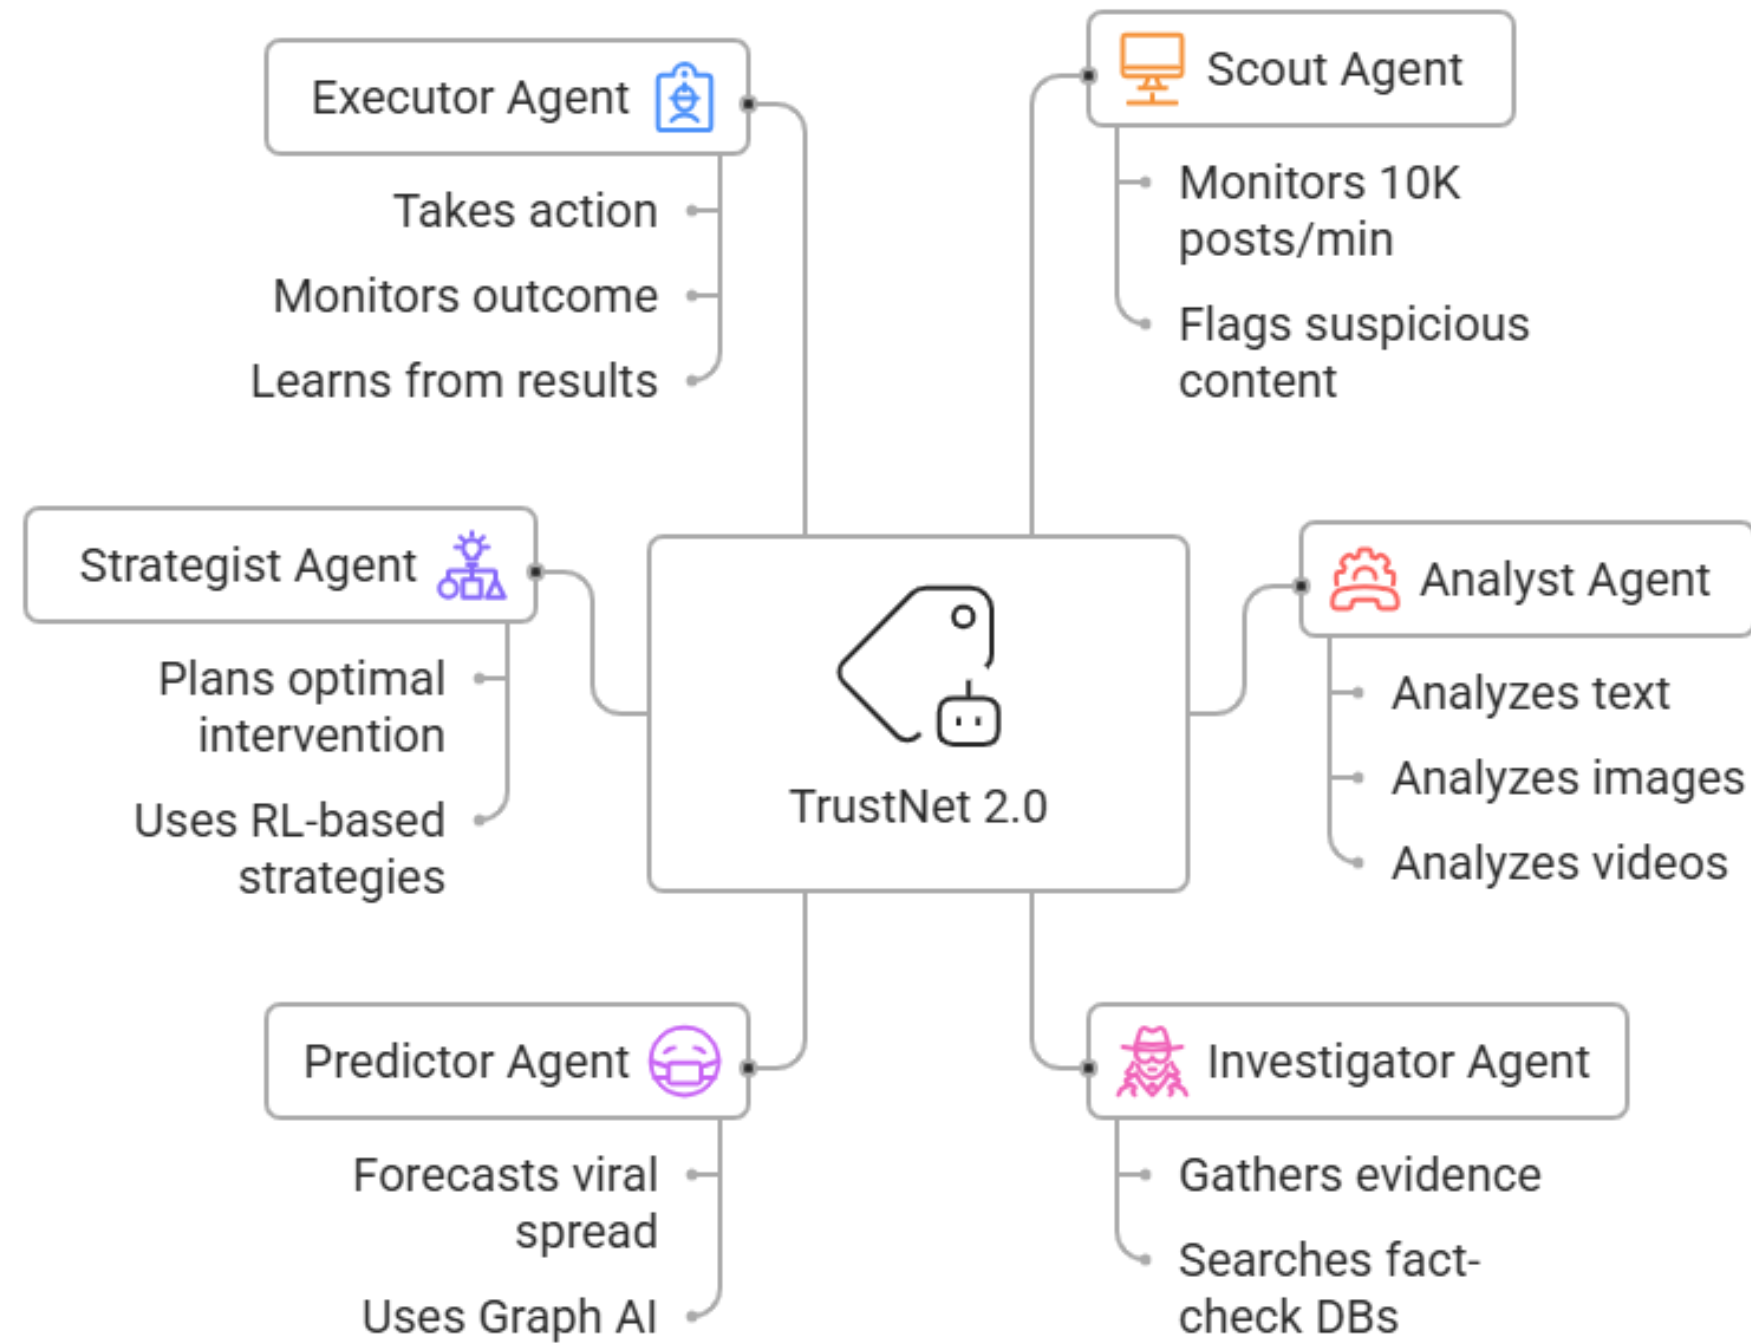

EXISTING APPROACHES ARE BROKEN

MANUAL REPORTS: Requires user flagging
DELAYED: 24-48 hour review time
INCONSISTENT: Human bias
NOT SCALABLE: Can't handle billions of posts

MANUAL REPORTS: Requires user flagging
DELAYED: 24-48 hour review time
INCONSISTENT: Human bias
NOT SCALABLE: Can't handle billions of posts

OUR PROPOSED SOLUTION

TECH STACK

AI : NLP GPT / Grok(API-based),
Python

- Computer Vision: OpenCV, EasyOCR
- Speech-to-Text : Whisper API / Google Speech-to-Text
- Text-to-Speech: gTTS, pyttsx3
- Interface: Streamlit / Flask
- Programming Language: Python 3.10+Clip

BUSINESS MODEL

TIER 1: FREEMIUM (Individual Users)

- 100 checks/month free
- Basic dashboard
- Revenue: Ads + upgrades

TIER 2: PROFESSIONAL (₹4,999/month)

- Unlimited checks
- API access (1000 calls/day)
- Advanced analytics
- Target: Journalists, NGOs, researchers

TIER 3: ENTERPRISE (₹49,999/month)

- White-label deployment
- Custom model training
- 24/7 support + SLA
- Target: Twitter, Facebook, news orgs, government

YEAR 1 PROJECTIONS:

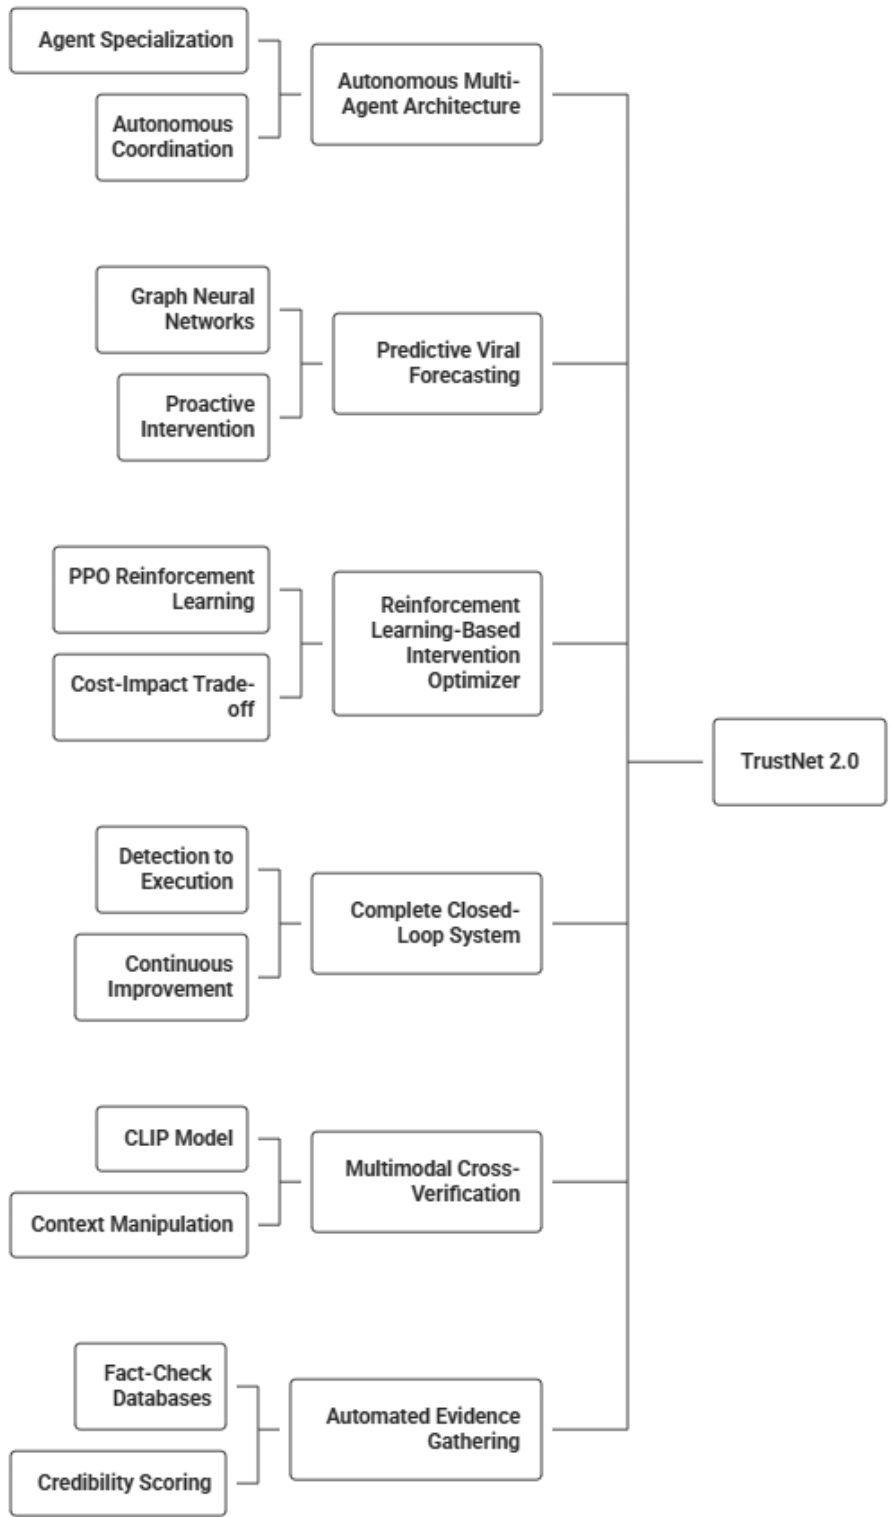

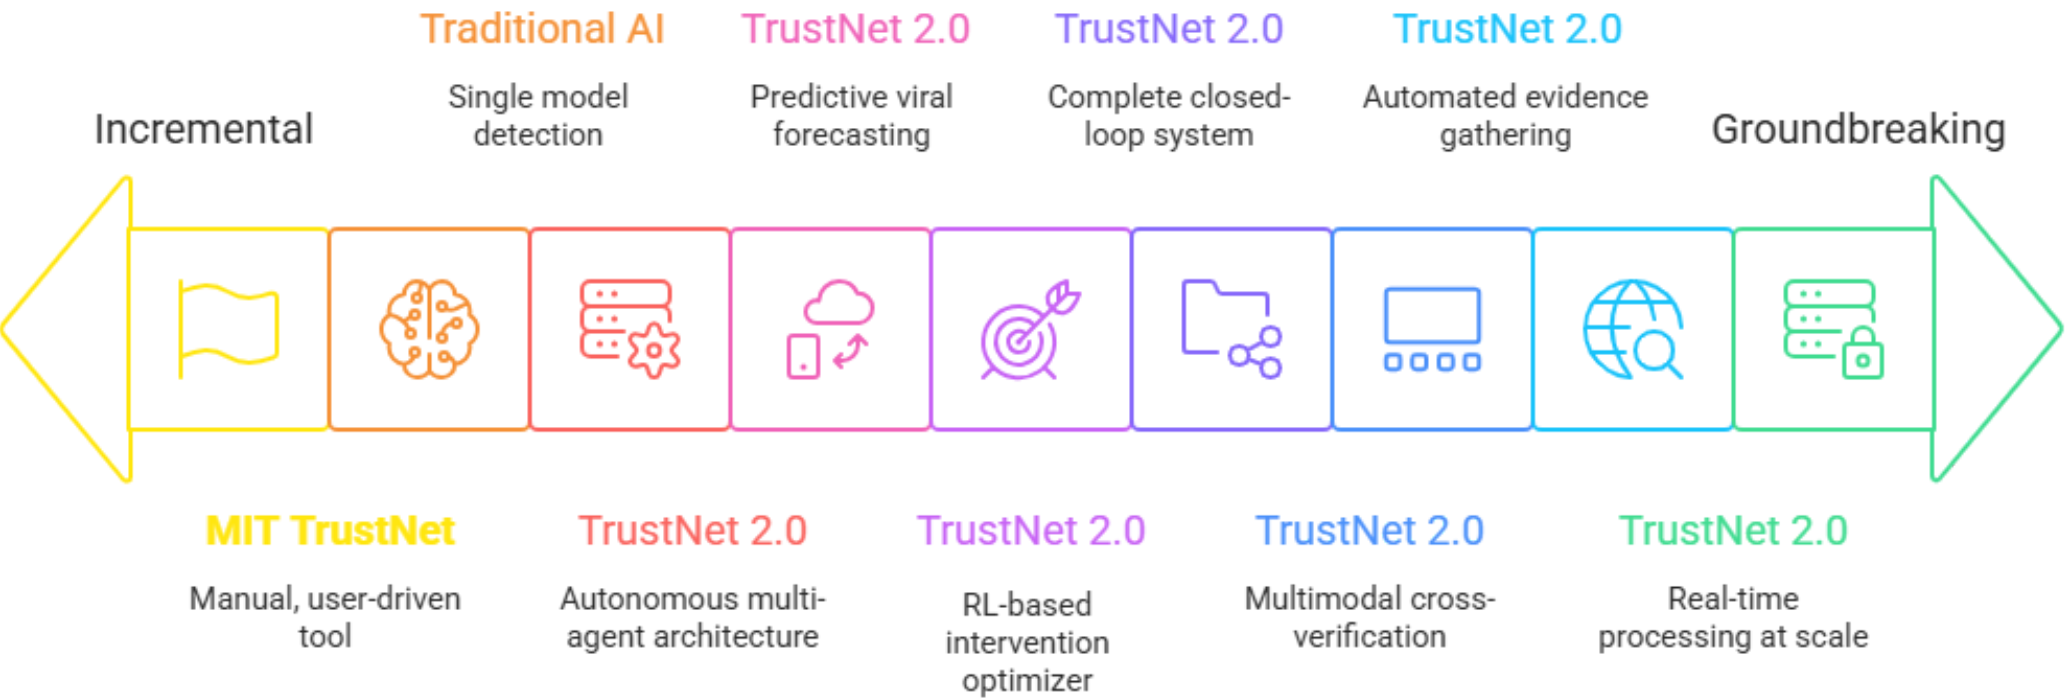

- 500 Professional users: ₹30 lakhs
- 5 Enterprise clients: ₹3 crores
- Total ARR: ₹3.3 crores

FUTURE SCOPE

Characteristic	Focus	Key Technologies	Impact
Phase 1: Immediate Enhancements	Multi-language support, deepfake detection, mobile app, browser extension	Multilingual RoBERTa, Wav2Lip, WavLM	10x larger addressable market, detect fake political speeches
Phase 2: Advanced Intelligence	Predictive narrative detection, behavioral profiling, emotion AI	Monitors fringe platforms, influence scoring, 8-emotion detection	Stop misinformation at source, +10% manipulation detection
Phase 3: Ecosystem Expansion	Blockchain verification, crowdsourced marketplace, API marketplace, educational platform	Blockchain, AI hybrid verification, public API	Cannot be censored, builds trust, 10,000 active fact-checkers
Phase 4: AI Advancement	Generative countermeasures, neuro-symbolic AI, federated learning, quantum-resistant security	AI generates counter-narratives, combines neural learning + symbolic reasoning	Higher accuracy + explainability, learn globally, preserve privacy
Phase 5: Global Expansion	Regional customization, government integration, academic collaboration, non-profit foundation	Custom models, election commission partnerships, open dataset releases	Official validation, scale, digital truth as public good
